Reasons for Allowance

A Request for Continued Examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed 12/12/2011 has been entered.

The Request for Continued Examination filed 12/12/2011 has been carefully considered. The following information has been made of record in the RCE filed for the instant application:

Claims 1, 7, 8, 13, 18 and 19 have been amended. In claims 1 and 13 the recitations "filtering out any undissolved particles; and" and "filtered" have been added. In claims 7 and 18 the claim dependency has been changed from claim 30 and claim 31 respectively to claim 1 and claim 13 respectively. In claims 8 and 19 the terms "step (c)" has been amended to recite "step (d)".

Claims 1-8, 12-19 and 23-29 are pending in the case.

The following is an examiner's statement of reasons for allowance:

The rejection of Claims 1-6, 8, 12-17, 19 and 23 under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential elements, such omission amounting to a gap between the elements. See MPEP § 2172.01, wherein the omitted elements are: the step of filtering out any undissolved particles, originally recited as step (c), has been overcome by amendment. The said step has been inserted in claims 1 and 13.

The rejection of Claims 1-8, 12-19 and 23-31 under 35 U.S.C. 103(a) as being unpatentable over Farag et al (Bull. Pharm. Sci. Assiut University, 1998, 21(1), 1-6) and

Art Unit: 1623

Feldman et al (Phytochemistry, 1999, 51, 867-72) in view of Pfeffer et al (US 4,107,425), Experimental Organic Reactions (1957, 18, pages 504-505, English Translation) and Ault (Techniques and Experiments for Organic Chemistry, 1987, pages 44-46 and pages 120-21) has been withdrawn in view of applicants' arguments.

The instant invention deals with the separation of the alpha and beta-anomers of penta-O-galloyl-D-glucose (PGG) from a mixture via crystallization. While separation of anomers by crystallization in general is known in the art, the prior art of record does not suggest that the alpha and beta anomers of PGG could be separated via the same technique. The choice of solvent for the separation of the two anomers is also not routine. With no guidance in the prior art, one of ordinary skill in the art would be reduced to trial and error to arrive at the instant invention. The instant method of separation of the anomers of PGG is therefore not rendered obvious by the prior art of record.

Any comments considered necessary by the applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance".

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Ganapathy Krishnan whose telephone number is 571-272-0654. The examiner can normally be reached on 9.00am-5pm; Mon-Fri. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Shaojia A. Jiang can be
